

EXAMINATION GUIDELINES FOR INFOSYS CERTIFICATION

All rounds of Infosys Certification will be Web-proctored and online. Please adhere to the requirements and guidelines shared below to appear in the examination.

SYSTEM REQUIREMENTS

Please ensure that the laptop/desktop computer you plan to use for taking the online tests fulfills the following system requirements. Taking the test on a mobile or a tablet is not recommended.

- i3 Core processor or higher
- 4GB RAM
- Fully functional webcam. You can test your webcam at <https://webcamtests.com/>
- Google Chrome browser version 70 or above with a disabled pop-up blocker. Taking the test on any other Web browser is not recommended
- A stable Internet connection of a minimum 2 Mbps download and 1 Mbps upload speed
- Uninterrupted power supply for the duration of the tests.

To check your system readiness, click on the link: <https://rec-test.infosys.com/precheck>

LOCATION AND OTHER REQUIREMENTS

- Select a location where you can remain undisturbed for the entire duration of the tests.
- The desk or the walls around you must not have any writing or pictures of people.
- The room should be as quiet as possible. Ensure there is no background noise such as music, television, people chatting.
- The lighting in the room must be bright enough to be considered 'daylight' quality. Overhead lighting is optimal. Ensure that the source of light is in front of you and not behind.
- Ensure you have a comfortable chair and are seated upright. Your face should be visible so that the webcam can detect and capture snapshots frequently. Partial face visibility will be considered a violation of instructions for the tests.
- Ensure that there are no people around you. If anyone else apart from you is detected in the video, you will be disqualified from the Infosys Certification and recruitment process.
- The use of online communication applications during the tests is strictly prohibited. Before you begin to take the test, ensure you close all programs and applications, including communication applications like Skype, Microsoft Teams, etc.
- Use of mobile phones for any reason other than mobile hotspot and tethering is prohibited and will lead to disqualification from Infosys Certification and the recruitment process.
- You may keep stationery items with you for taking the tests. The use of calculators and similar devices is not allowed during the tests.

- Do not switch out of the test screen to another window, as it violates the code of conduct for the test. The test platform automatically tracks moving out of the test screen.
- Login within 30 minutes from the start of the test slot time as the login window will remain open for 30 minutes once the test time begins. For example, if, as per the slot, the test is at 11 AM, then you must log in and start the test latest by 11:30 AM. If you miss the login window, you will not be able to take the test. Infosys does not consider any exemption in this regard.

BEHAVIORAL GUIDELINES

The entire duration of the test is Web-proctored. You will be on video, and therefore, please ensure the following:

- You must dress as though you are in a public setting
- You must not use headphones, earphones, or any other type of external audio equipment
- You must not communicate with any other person by any means
- You must not leave the video frame during the exam for any reason.

THE CERTIFICATION ROUND

- The Certification Round will have a mix of objective and hands-on questions to be answered in three hours. The questions are divided into three sections:
 - o Section I – Java/Python* Hands-on – 2 questions
 - o Section II – Java/Python* Multiple Choice Questions – 10 questions
 - o Section III – Database Management Systems – 10 questions
- The questions will be based on the programming language (Java/Python) selected at the time of booking the test slot
- There will be no negative marking in the Certification Round examination
- If you score 65% or above in this round and clear a few post-round necessary checks, you will have the option to either appear in the Advantage Round or appear in a techno-behavioral interview for the Systems Engineer role at Infosys and become an Infosys Certified Software Programmer.

THE ADVANTAGE ROUND

- This round is an advanced test that will assess your programming and other technical skills
- It comprises three programming-based questions of varying difficulty levels to be answered within three hours
- Each question will have a different weightage of marks

- In addition to the programming language (Java/Python), you will have the option to attempt this round in other languages. You can decide the programming language to take Advantage Round on the day of the test
- Candidates who clear the Advantage Round will get a pre-replacement interview opportunity for either the Specialist Programmer or the Digital Specialist Engineer role based on their performance in this round. The interview for these roles will assess the technical and behavioral skills of the candidate.

IMPORTANT NOTICE: If you are found indulging in malpractice, including but not limited to appearing for multiple certification exams using different or fake credentials, at any stage of the Infosys Certification program, Infosys will invalidate your Infosys Certification and the job offer with immediate effect.
